

Vitol-140

Vitamin A, D₃, E injection

*For the prevention or treatment of vitamin A,
vitamin D₃ and vitamin E deficiencies*

Vitol-140

Solution for parenteral administration

Vitamin A is involved in the process of formation and preservation of function of epithelial tissues and mucous membranes, is important for fertility and is essential for vision. Vitamin D₃ regulates and corrects calcium and phosphate metabolism in blood and plays an important role in the uptake of calcium and phosphate from the intestines. Especially in young, growing animals vitamin D₃ is essential for the normal development of skeleton and teeth. Vitamin E is, as a fat-soluble intracellular antioxidant, involved in stabilising unsaturated fatty acids, thereby preventing toxic lipo-peroxides formation. Furthermore, vitamin E protects the oxygen-sensitive vitamin A from oxidative destruction in this preparation.

INDICATIONS

Vitol-140 is a well balanced combination of vitamin A, vitamin D₃ and vitamin E for calves, cattle, goats, sheep, swine, horses, cats and dogs. Vitol-140 is used for:

- Prevention or treatment of vitamin A, vitamin D₃ and vitamin E deficiencies in farm animals.
- Prevention or treatment of stress (caused by vaccination, diseases, transport, high humidity, high temperatures or extreme temperature changes).
- Improvement of feed conversion.

VITAMINS

COMPOSITION PER ML

Vitamin A, retinol palmitate	80 000 IU.
Vitamin D ₃ , cholecalciferol	40 000 IU.
Vitamin E, α-tocopherol acetate	20 mg.

DOSAGE

For intramuscular or subcutaneous administration.

Cattle and horses :	10 ml.
Calves and foals :	5 ml.
Goats and sheep :	3 ml.
Swine :	5 - 8 ml.
Dogs :	1 - 5 ml.
Piglets :	1 - 3 ml.
Cats :	1 - 2 ml.

PACKAGING

Vial of 100 ml.
